

INTERNATIONAL DAY OF LIGHT

May 16th and 22nd

A webinar will take place to celebrate the International Day of Light (IDL).

The EU GREEN alliance have organised a series of talks on topics related to light.

Topics focus on:

- Trends in the new generation solar cells research.
- From light to sustainable development.
- Outdoor Lighting and Sustainability: Ecological Impacts and Future Directions.
- Lighting up Lives: A Cause-Related Marketing case to solve energy poverty and improve quality of life in Pakistan.
- Diagnostics, therapy and surgery via emerging laser technology.
- Let there be light... or when Science meets Art.
- Optical Transport Systems for the Next Decade
- Building Technology and Sustainability: Fiber Sensing and Optical Transponders in Industry and Society.
